

BIOPRODUCTS AND IN VITRO STUDIES FOR SPECIES SELECTION

LITTLE PIGS, BIG IMPACT

**Need help evaluating if the Sinclair Nanopig[®] or the Yucatan
is the right model for your compound? NO PROBLEM.**

Sinclair Bio Resources can provide most tissue and fluid samples needed for in vitro metabolism studies for species selection.

We can also utilize our network of consultants and industry experts to help you design the most appropriate studies to evaluate if the Sinclair Nanopig[®] or the Yucatan is right for your compound.

BioIVT can supply Sinclair Nanopig[®] and Yucatan hepatocytes, microsomes, and S9 fractions as part of its market-leading portfolio of ADME products.

BioIVT also offers expertise to design and implement comprehensive in vitro ADME programs, including cross-species metabolic ID (MetID) studies, enzyme induction, and other studies utilizing the Sinclair Nanopig[®] and the Yucatan.
